

BE  THE MATCH®

**TOGETHER**  
WE DELIVER CURES  
FOR BLOOD CANCER  
2014 Report to the Community

— Jade, marrow transplant recipient,  
with her brother and mom

“ If Laura hadn’t joined the registry—I don’t know—I don’t want to think about what would have happened. We will spend the rest of our lives saying thank you.

— Owen’s mom

Pictured: Owen, transplant recipient, with his marrow donor, Laura

# WE ARE **DEDICATED** TO DELIVERING CURES FOR BLOOD CANCERS.

Every three minutes someone is diagnosed with a blood cancer like leukemia, lymphoma, or other life-threatening disease. And 70 percent of patients do not have a matched marrow donor in their family. They depend on us to find a life-saving match.

Thanks to you—our growing community of financial supporters, marrow donors, volunteers, health care professionals and researchers—more patients are receiving the life-saving marrow or cord blood transplant they need.

## Your support makes it possible for us to continue to:

- Grow the world's largest and most diverse registry of potential donors
- Support patients and their families before, during and after transplant
- Conduct research and education to expand treatment and improve outcomes
- Engage the public in our life-saving mission

Thank you for your never-ending passion and dedication to saving lives. Because of you, patients are finding a cure.

Jeffrey Chell, M.D.  
CEO  
National Marrow Donor Program®/  
Be The Match®

Christine Fleming  
President  
Be The Match Foundation®

## 2014: YEAR AT A GLANCE

**Helped 6,300**  
patients receive a  
**marrow transplant**  
Totaling **68,000** marrow  
**transplants** since 1987

Grew the Be The Match Registry® by  
**546,000** new potential donors

**45%** with  
diverse ancestry

Provided **\$3.5 million**  
in patient assistance  
for **1,900** families

Added **20,800** new umbilical  
**cord blood units**

Advanced research with  
**250** studies underway

Engaged  
**volunteers**  
**125,000**  
hours → a value of  
more than  
**\$2.8 million**

**44,000** financial contributors  
gave almost **\$9 million**

Thank you for saving our daughter's life  
and keeping our family whole.

—Taneika: mother and caregiver  
of transplant recipient Jade

# WE ARE GRATEFUL

When **JADE** was just a toddler, she was diagnosed with acute myeloid leukemia (AML). “We were floored. It was hard to swallow because she wasn’t even two years old,” says Taneika.

But Jade’s bright, bubbling spirit kept the family going and, after eight months and five rounds of chemotherapy, Jade was in remission. Like any parent, Taneika was overjoyed, but she privately worried that it was too good to be true. “Our family had a renewed sense of living life to the fullest, but it always felt like I was looking over my shoulder.”

The remission lasted almost two years, but then, just a few weeks shy of her fourth birthday, Jade’s family received heartbreaking news. Her leukemia had returned. But there was hope—a transplant could save her life.

Doctors located an umbilical cord blood match and Jade celebrated her “re-birthday” in July. The special day was filled with celebration banners, cupcakes and Jade’s favorite thing in the world—music.

By day 29, tests showed the transplant had been a success. Jade is currently healthy, happy and cancer free.

*“We are eternally grateful to the mother who made Jade’s transplant possible when she donated her newborn baby’s cord blood, to Be The Match for facilitating her gift and to Jade’s medical team for their incredible support. Thank you for saving our daughter’s life and keeping our family whole.”*

[Learn how your baby’s umbilical cord blood could save a life.](#)

I want to stand for something, and I am proud to represent Be The Match.

—Denisse: registry member,  
Be The Match On Campus student leader,  
pre-med student

Photo: Jesse Hutcheson

# WE ARE **INSPIRED**

**DENISSE**, a senior at Christopher Newport University, is her campus president of [Be The Match On Campus](#)®—a fast-growing program currently active on 90 college campuses, that encourages students to raise funds, raise awareness and add potential marrow donors to the [Be The Match Registry](#)®. Denisse learned about the program during her freshman year.

“My childhood best friend had leukemia. It astounded me and gave me hope to learn that swabbing my cheek could result in a match for someone in need of a marrow transplant,” she says. “I immediately wanted to get involved.”

A biology major with hopes of becoming a pediatric oncologist, Denisse describes her leadership role with Be The Match On Campus as life changing. “I tend to be shy. Letting go of my fear to educate my peers about marrow donation has made me a better speaker and taught me to put others’ needs before my own,” she explains. “Plus, I love to talk about the science and the idea of matching as ‘DNA soul mates.’”

So far, her chapter’s efforts have paid off, as at least two students at her school have gone on to donate their marrow. “It’s inspiring to be a part of my campus legacy and to make a difference for patients worldwide,” she says.

*Be The Match On Campus volunteer*

## **GROWING THE RIGHT REGISTRY**

When a patient’s life depends on receiving a transplant, they need a matched marrow donor who is committed and available when called. That’s why we focus our efforts on recruiting registry members who are young, diverse and committed to helping save a life.

And because healthy, diverse donors age 18–44 provide the greatest chance for a successful transplant, peer-to-peer campus recruitment is a great way to help every patient find the best chance for a cure.

### **WE STRIVE TO:**

- Increase diversity
- Attract committed donors
- Fundraise to support the mission
- Add more umbilical cord blood units
- Partner with clinicians to provide optimal care

By mobilizing funds, the *Be The Match Patient Assistance Fund* helps ensure every patient can get the transplant they need. We are honored to be included in the fight.

—John and Caryn Camiolo:  
Patient Assistance  
Endowment founders

# WE ARE **PASSIONATE**

In 1994, **JOHN AND CARYN CAMIOLO** watched a news story about Baseball Hall of Fame legend Rod Carew; his daughter's cancer journey and their desperate struggle to find her a matching marrow donor. Parents themselves, the Camiolo's empathized with Rod's plea and knew they wanted to get involved.

Soon after, John and Caryn started hosting marrow drives to encourage people to join the registry. "We encountered numerous patient families struggling with transplant-related expenses including travel, housing, deductibles and copayments. These costs were debilitating for many families. We felt called to help."

John and Caryn became very involved with Be The Match. As key financial supporters, they established the John and Caryn Camiolo Patient Assistance Endowment Fund to help ensure that patients experiencing financial strain could afford the marrow transplant and post-transplant care they needed.

"Be The Match Patient Assistance is important because it helps families through an experience that can be the darkest period in a family's history," says John. "A parent, spouse, or child falling seriously ill puts a terrible strain on even the most stable families. It means so much to us to help these families, many of whom travel across the country for even the slimmest chance of receiving help. No family should be distracted by finances when they are focused on getting well."

For John and Caryn, giving back is a natural next step. "Caryn and I are honored and so very grateful to Be The Match for recognizing this need and facilitating this fund," says John. "We are happy to contribute to such a worthy cause and we encourage everyone to consider giving what they can."

[Read more about how your gift saves lives.](#)

*[Bella](#): leukemia patient*

## **SUPPORTING PATIENTS, FAMILIES AND CAREGIVERS**

We provide one-on-one support to patients and their families offering the education, resources and guidance they need before, during and after transplant.

Most transplant recipients spend six months or more recovering from their transplant. Time away from work and uninsured costs associated with treatment can put a financial strain on the family. We step in to help through our [Patient Assistance Program](#). In 2014, we provided \$3.5 million in patient assistance grants to help families focus on what matters most—getting well.

The BMT unit is a place that needs hope, and just by looking at me, I give that hope to both my colleagues and patients—I'm someone who has walked in their shoes and truly understands.

—Becky: transplant recipient,  
BMT nurse coordinator,  
cancer researcher, patient advocate

# WE ARE CLINICIANS

**BECKY** is a bone marrow transplant (BMT) nurse at Moffitt Cancer Center in Tampa, one of our Network transplant centers. We work with clinicians like Becky every day to help patients before, during and after transplant. While all nurses give patients and families hope, Becky has something extra special to offer—her own experience as a transplant recipient.

When Becky was just 18 years old, she received a marrow transplant for chronic myeloid leukemia, with her sister as her donor. The transplant was a success and allowed Becky to return to college. Then, just weeks before graduating as a nursing major, Becky received heartbreaking news. Her cancer had relapsed.

Over the next 18 years, Becky’s doctors used medications and donor lymphocyte infusions to manage her cancer, but she struggled to stay healthy. “I could never make it past the three-year mark. The cycle of relapse and remission became my new normal,” says Becky. “I love working with patient families, but when I couldn’t because my immune system was vulnerable, I worked as a BMT research nurse. It was rewarding to help further the science.”

In 2010, after her sixth relapse, Becky’s doctors decided it was time for a different approach. A search began for an unrelated marrow donor and three fully matched donors were located. “Not every patient has a match. I felt lucky and grateful.”

Becky was admitted as a patient in her own unit. The transplant was a success and recently, for the first time ever, Becky sailed past her three-year, post-transplant check-up with a clean bill of health. She is making plans for the future and, at the top of her list, is a trip to hug the young man who stepped forward as her marrow donor and saved her life.

[View our website for health care professionals.](#)

## OUR GLOBAL NETWORK OF CARE

From the moment doctors search our registry for a donor, to the safe delivery of the life-saving cells to patients’ bedsides for transplant, and for years after, we are there every step of the way. Our global network counts on our technology, expertise and unparalleled logistical support to make transplants possible. And 45 percent of transplants we facilitate have either an international donor or recipient. Saving lives drives our never-ending passion and dedication to help every patient get the transplant they need.

“If I had to do it all over again,  
I wouldn’t change a thing.  
It gave me the feeling of, ‘I’m  
doing something that’s bigger  
than myself,’ It’s rare when you  
can say you’ve done that.”

*—Ron: two-time marrow donor*

# WE ARE COMMITTED

---

**RON** joined the [Be The Match Registry](#) during a recruitment drive at his high school. Little did he realize he would be someone's match not once, but twice.

Eight years after joining, we contacted Ron as a potential match. "I was nervous, excited and, honestly, a little scared." But he was committed to going through with it. The nurses put Ron at ease about his peripheral blood stem cell (PBSC) donation. "It was surprisingly simple," he said. "I felt tired, but good. I was really happy knowing I helped save a life."

Although his recipient eventually passed away, Ron learned that his donation gave her more precious time to spend with her children and grandchildren.

In 2011, Ron was contacted again and donated marrow for a patient diagnosed with leukemia. "I remember getting anesthesia, then waking up later wondering where the time went." About two weeks later, Ron returned to work and resumed his normal schedule.

Ron recently met his recipient, Marla. They've become friends on Facebook and chat over the phone.

Ron encourages others to join the registry. "Don't let your fears dictate your actions. If you have questions and concerns, ask Be The Match. They'll give you resources to help you make an educated decision."

[Learn how marrow donors and patients are matched.](#)

*"A marrow transplant was my only chance for survival... I just kept looking at that bag of stem cells and thinking, 'this is going to save my life and get me back home'... I was so thankful for the man who went through this process for a complete stranger, and I just kept praying for God to bless his life."*

*—Marla: Ron's second transplant recipient*

It's given us so much hope to watch our community give, join or volunteer for Be The Match. For us, it means that people care about our son.

—Bryce: father of [Judah](#) (left), searching for a marrow donor

# WE ARE INVOLVED

---

**GIVE.** Dan and his wife, Deb are committed to reducing barriers to transplant. Grateful for Dan's own transplant in 2005, they understand the obstacles many families face. "Funding is critical for the Be The Match mission and the lives they save. I have lived a very happy and fortunate life and I am proud to give back," says Dan.

**JOIN.** Justin is a husband, father, high school football coach, and a two-time cancer survivor. When he learned he needed a marrow transplant, he made it his mission to pay-it-forward by adding more Hispanic members to the Be The Match Registry. "I figured if I can bring awareness, and let other people know about saving lives with marrow, it could make the world a better place," said Justin. "I tell people, 'you could be a blessing, the answer to someone's prayers who's been waiting for a second chance.'"

**VOLUNTEER.** Ted is a transplant recipient and a Peer Connect volunteer, a program that puts patients and caregivers in touch with other recipients and caregivers to answer questions and share their own transplant experiences. "Being part of the [Be The Match Peer Connect Program](#) has been equally beneficial for me as for the people I talk to. It can be easy sometimes to lose sight of how far you've come in your recovery. But focusing on the advances is a great motivator to keep going, to make the most of each day and all the days ahead."

We deal with millions and millions of HLA records. Computer science makes it possible to use the data to improve transplant outcomes. It's exciting to explore this new frontier where big discoveries are still happening.

—Loren Gragert: senior bioinformatics scientist

# WE ARE **RESEARCHERS**

**LOREN GRAGERT** is a senior scientist in our Bioinformatics Research Department. “When I was a senior in high school, I read an article in *Wired Magazine*, about the emerging field of bioinformatics—the place where genetics and computer science intersect. It was a new frontier, someplace I felt I could make an impact.”

Our Bioinformatics Department focuses specifically on understanding the immune system genes that determine transplant compatibility between donor and recipient. “We’re working on extremely challenging research projects,” says Loren. “They require a wide variety of skills and good communication between geneticists, statisticians, software developers, physicians, executives and researchers around the world.”

One of the most visible products the Bioinformatics Research team has developed is the transplant matching algorithm, HapLogic®, used by transplant centers to identify the best-matched donor for each patient given the genetic data we have.

And in 2014, Loren was the lead author of a study published in [\*The New England Journal of Medicine\*](#) that showed that nearly all patients have a suitably-matched donor on the registry, but not all patients have an optimal match. For example, patients of White European ancestry are more likely to find a better match than patients from minority ethnic groups.

“This type of biomedical research is essential to helping us determine the most effective way to grow the registry, and improve transplant outcomes,” says Loren. “The most fulfilling thing about this type of work is that it translates into a direct benefit for the patients we serve.”

## **CIBMTR**

The Center for International Blood and Marrow Transplant Research® (CIBMTR) is the research program of the National Marrow Donor Program/ Be The Match, in collaboration with the Medical College of Wisconsin. CIBMTR is committed to supporting the highest level of clinical and health services research.

Now in its tenth year, CIBMTR has facilitated critical prospective and observational research that has led to increased survival and an enriched quality of life for thousands of patients.

# AMY'S TRANSPLANT JOURNEY

Amy—a wife, mother and outdoor enthusiast—was diagnosed with severe aplastic anemia, a rare bone marrow disease, in 2009. After learning her sister was not a match, Amy underwent immunosuppressive therapy, with hopes of a full recovery. Sadly, she only partially recovered and developed additional complications. Exhausted, devastated and unable to care for her young daughter, Amy's only hope for a cure was an unrelated marrow transplant.

Amy shared the following key milestones to keep friends and family informed.

*I have a match! I'm anxious about this treatment, but excited that it may be a pathway to a better quality of life.*

**FIVE DAYS OF CHEMO**  
*complete. My body is ready for transplant.*

**DAY 3:** *Waiting for my new cells to engraft. Feeling crummy, but I'm so glad to have my sister here.*

**IN ROUTE** to the transplant center, our wonderful neighbors surprised us with signs of support.

**DAY 0:** *Here we go—stem cells are in the room. It's transplant time!*

**DAY 19:** *Anxiously waiting for my platelet count and feeling overwhelmed that a stranger gave me a second chance at life.*

**DAY 35:** Outpatient status—hooray! I need to wear a mask to protect my immune system, but it feels so good to be outside again.

**DAY 85:** I am slowly regaining strength by biking after my daily clinic appointments.

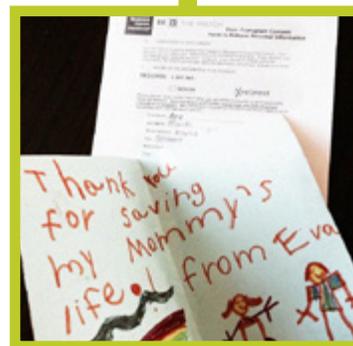

**DAY 152:** It's Eva's first day of kindergarten. I am experiencing some graft-vs-host disease (GVHD), but I am so lucky and thankful for every precious moment with Eva and Jeff.

**DAY 36:** Eva sprinted into my arms after 36 days apart. What an amazing moment.

**DAY 108:** Mommy is home! Words cannot describe how thankful I am for all the prayers and support. I still have weekly appointments, but the prognosis looks good!

**DAY 300:** This is Eva's note to my donor and my consent form allowing him to contact me. I sincerely hope that someday we have the opportunity to meet!

**DAY 365:** Today is the one-year anniversary of my marrow transplant—truly a gift of life. We couldn't have made it to this milestone without you. Thank you from the bottom of our hearts!

*Jiro (top center): marrow donor, parent of transplant recipient, Be The Match Foundation board chair, leader of the 2014 top fundraising Be The Match Walk+Run® team. Pictured with his family, and his physician, Dr. Nancy Kernan (right).*

*“It is such a rewarding experience to continually deepen my engagement and give back to an organization that has done so much for families, including mine.”*

Jiro’s son, [Finn](#), received an unrelated marrow transplant when he was one. Filled with gratitude, in 2011, Jiro was given the opportunity to pay-it-forward when he donated his marrow to a searching patient.

Today, Jiro’s passion for Be The Match continues to grow. A board member and champion for recruitment within ethnic communities, Jiro inspired his employees to participate in [Be The Match Walk+Run](#), our signature 5K fundraising event. Now held in 17 cities across the country, Jiro’s team was among the nearly 12,000 walkers, runners, contributors and volunteers who raised more than \$1.5 million to deliver cures for blood cancer.

## HOW WE SPEND EACH DOLLAR

86¢

Goes to patient, donor, registry, research and medical education services

14¢

Goes to management and fundraising expenses

**WE RAISE FUNDS TO:**

**Help patients overcome the financial barriers to transplant.**

Because insurance doesn't cover all the costs that come with a transplant, many families are not able to afford treatment. But there is hope. And it comes from people like you.

**Grow the registry to create more matches.** While millions have joined the Be The Match Registry, many patients still can't find a match, particularly those with diverse racial and ethnic backgrounds. Your contributions add more potential marrow donors to the registry.

**Conduct life-saving research.**

Our dedicated research program, CIBMTR, leads cutting-edge studies to advance the science of transplant. We have over 250 research studies in progress to improve transplant outcomes, reduce complications, treat more diseases and provide a cure to more patients.

# THANK YOU CONTRIBUTORS

Our sincerest thanks to the following individuals, families, corporations and organizations who generously donated more than \$9 million during our fiscal year ending September 30. With your charitable support, we are able to help more patients afford transplant, add more potential marrow donors to the registry and fund our life-saving research.

*“Knowing that our program has a tremendous impact spurs me on to do more.”*

—[Andy Talley](#): founder of Andy Talley Bone Marrow Foundation

Recognizing that his young, healthy and diverse football players had the potential to become marrow donors, Talley started a program in 2008 called “Get in the Game. Save a Life.” Inspired by his efforts, more than 52,000 young people—many of whom are athletes—have become potential marrow donors. Of those, 194 have gone on to save a life.

† Deceased

*“There are other people out there who love their child just as much as we love Lachlan, and there are so many other people who need a match.”*

—Mary: mother of transplant recipient, [Lachlan](#)

Mary and Jason know firsthand what watching a child battle for their life feels like. That’s why, when their 2-year-old son needed a marrow transplant, they wanted to do more. The family held their first fundraising and registry drive only weeks after Lachlan’s diagnosis and, since then, they have set up numerous drives and fundraising events. “Getting people to join the registry has turned into a passion of mine. Lachlan is going to make a difference for Be The Match.”

## THANK YOU MEDIA PARTNERS
